

## ROOF SUPPORT AND SERVICE PLATFORM SYSTEM

# Adjustable/rotational rooftop foot base channel support OGPDRG

- **Corrosion protection:** hot-dip galvanized
- **Application:** construction of support structures for installations and equipment. The rotatability of the support facilitates installation regardless of the direction of the slope. Suitable for all types of subsurfaces, including sloped roofs with membrane coating. The large area of the foot and EPDM mat ensures structural stability and even load distribution on the ground.
